## Helios Polyclonal Antibody

Catalog No         YP-Ab-01770           Isotype         IgG           Reactivity         Human;Mouse;Rat           Applications         WB;ELISA           Gene Name         IKZF2           Protein Name         Zinc finger protein Helios           Immunogen         The antiserum was produced against synthesized peptide derived from human IKZF2. AA range;331-380           Specificity         Helios Polyclonal Antibody detects endogenous levels of Helios protein.           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         Western Biot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2           Observed Band         56kD           Cell Pathway         Nucleus .           Tissue Specificity         Epithelium,Testis,           Function         function:Associates with Ikaros at centromeric heterochromatin., similarity:		
Reactivity Human; Mouse; Rat  Applications WB; ELISA  Gene Name IKZF2  Protein Name Zinc finger protein Helios  Immunogen The antiserum was produced against synthesized peptide derived from human IKZF2. AA range: 331-380  Specificity Helios Polyclonal Antibody detects endogenous levels of Helios protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purlification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band 56kD  Cell Pathway Nucleus.  Tissue Specificity Epithelium, Testis,  Function function: Associates with Ikaros at centromeric heterochromatin., similarity: Belongs to the Ikaros C2H2-type zinc-finger protein family, similarity: Contains 6 C2H2-type zinc fingers. subunit: Interacts with IKZF4 AND IKZF5.  Background helios) are hematopoietic development. This protein forms homo- or hetero-dimers with other laros formity members, and is shought to function predominantly in early hematopoietic development. This protein forms homo- or hetero-dimers with other laros formity members, and is shought to function predominantly in early hematopoietic development. This protein forms homo- or hetero-dimers with other laros formity members, and is thought to function predominantly in early hematopoietic development. This protein forms homo- or hetero-dimers with other laros formity was been found for this gene, but the biological validity of some variants isoforms have been found for this gene, but the biological validity of some variants	Catalog No	YP-Ab-01770
Applications WB;ELISA  Gene Name IKZF2  Protein Name Zinc finger protein Helios  Immunogen The antiserum was produced against synthesized peptide derived from human IKZF2. AA range:331-380  Specificity Helios Polyclonal Antibody detects endogenous levels of Helios protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band 56kD  Cell Pathway Nucleus .  Tissue Specificity Epithelium, Testis,  Function function: Associates with Ikaros at centromeric heterochromatin, similarity: Belongs to the Ikaros C2H2-type zinc fingers, subunit: Interacts with IKZF4 AND IKZF5.  Background This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This protein forms homo- or hetero-dimers with other Ikaros family members, and is thought to function predominantive aren't hematopoietic development. Multiple transcript variants encoding different isoforms have been found for this gene, but the biological valdity of some variants isoforms have been found for this gene, but the biological valdity of some variants isoforms have been found for this gene, but the biological valdity of some variants	Isotype	IgG
Gene Name   IKZF2   Protein Name   Zinc finger protein Helios   Immunogen   The antiserum was produced against synthesized peptide derived from human IKZF2. AA range:331-380   Specificity   Helios Polyclonal Antibody detects endogenous levels of Helios protein.  Formulation   Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source   Polyclonal, Rabbit, IgG   Purification   The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution   Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration   1 mg/ml    Purity   ≥90%   Storage Stability   -20°C/1 year    Synonyms   IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2    Observed Band   56kD    Cell Pathway   Nucleus    Tissue Specificity   Epithelium, Testis,    Function   function: Associates with Ikaros at centromeric heterochromatin., similarity: Belongs to the Ikaros C2H2-type zinc-finger protein family., similarity: Contains 6 C2H2-type zinc fingers., subunit: Interacts with IKZF4 AND IKZF5.  Background   This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This protein forms homo- or hetero-dimers with other Ikaros family members, and is thought to function predominally in early hematopoietic development. Multiple transcript variants encoding different isoforms have been found for this gene, but the biological validity of some variants	Reactivity	Human;Mouse;Rat
Protein Name   Zinc finger protein Helios	Applications	WB;ELISA
Immunogen  The antiserum was produced against synthesized peptide derived from human IKZF2. AA range:331-380  Specificity  Helios Polyclonal Antibody detects endogenous levels of Helios protein.  Formulation  Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source  Polyclonal, Rabbit, IgG  Purification  The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution  Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration  1 mg/ml  Purity  ≥90%  Storage Stability  -20°C/1 year  Synonyms  IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band  56kD  Cell Pathway  Nucleus.  Tissue Specificity  Epithelium,Testis,  Function  function:Associates with Ikaros at centromeric heterochromatin.,similarity:Belongs to the Ikaros C2H2-type zinc-finger protein family,similarity:Contains 6 C2H2-type zinc fingers, subunit:Interacts with IKZF4 AND IKZF5.  Background  This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Alolos and Helios) are members of this protein family (Ikaros, Alolos and Helios) are members of this protein family (Ikaros, Alolos and Helios) are members of this protein family in the regulation of lymphocyte development. This protein forms homo- or hetero-dimers with other larger family members, and is thought to function predominantly in early hematopoietic development. Multiple transcript variants encoding different isoforms have been found for this gene, but the biological validity of some variants	Gene Name	IKZF2
IKZF2. AA range:331-380  Specificity Helios Polyclonal Antibody detects endogenous levels of Helios protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit,tgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band 56kD  Cell Pathway Nucleus.  Tissue Specificity Epithelium, Testis,  Function function: Associates with Ikaros at centromeric heterochromatin, similarity: Belongs to the Ikaros C2H2-type zinc-finger protein family, similarity: Contains 6 C2H2-type zinc finger subunit: Interacts with IKZF4 AND IKZF5.,  Background This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This protein forms home- or hetero-chimers with other lkaros family members, and is thought to function predominantly in early hematopoietic development. Multiple transcript variants encoding different isoforms have been found for this gene, but the biological validity of some variants	Protein Name	Zinc finger protein Helios
Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band 56kD  Cell Pathway Nucleus.  Tissue Specificity Epithelium, Testis, function: Associates with Ikaros at centromeric heterochromatinsimilarity: Belongs to the Ikaros C2H2-type zinc-finger protein familysimilarity: Contains 6 C2H2-type zinc fingers., subunit: Interacts with IKZF4 AND IKZF5.,  Background This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Alolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This protein forms homo- or hetero-dimers with other Ikaros family members, and is thought to function predominantly in early hematopoietic development. Multiple transcript variants encoding different isoforms have been found for this gene, but the biological validity of some variants	Immunogen	
Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2           Observed Band         56kD           Cell Pathway         Nucleus           Tissue Specificity         Epithelium,Testis,           Function         function:Associates with Ikaros at centromeric heterochromatin., similarity:Belongs to the Ikaros C2H2-type zinc-finger protein family., similarity:Contains 6 C2H2-type zinc fingers., subunit:Interacts with IKZF4 AND IKZF5.           Background         This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This protein forms howe on the regulation of lymphocyte development. This protein forms howe on the regulation of lymphocyte development. This protein forms howe of the first sencoting different learny hematopoietic development for this gene, but the biological validity of some variants	Specificity	Helios Polyclonal Antibody detects endogenous levels of Helios protein.
Purification  The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution  Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.  Concentration  1 mg/ml  Purity  ≥90%  Storage Stability  -20°C/1 year  Synonyms  IKZF2; HELIOS; ZNFN1A2; Zinc finger protein Helios; Ikaros family zinc finger protein 2  Observed Band  56kD  Cell Pathway  Nucleus  Epithelium,Testis,  Function  function:Associates with Ikaros at centromeric heterochromatin.,similarity:Belongs to the Ikaros C2H2-type zinc-finger protein family, similarity:Contains 6 C2H2-type zinc fingers.,subunit:Interacts with IKZF4 AND IKZF5.  Background  This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development.
