RPAP2 Polyclonal Antibody

Catalog No YP-Ab-01994 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB;ELISA Gene Name RPAP2 Protein Name Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2 Immunogen The antiserum was produced against synthesized peptide derived from human RPAP2. An range;460-509 Specificity RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II organism and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Isotype Reactivity Applications Gene Name Protein Name Immunogen Specificity	IgG
Reactivity Human;Rat;Mouse; Applications WB;ELISA Gene Name RPAP2 Protein Name Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2 Immunogen The antiserum was produced against synthesized peptide derived from human RPAP2. AA range:460-509 Specificity RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit.lgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cvtoplasm. Nucleus. Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain. Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffo	Reactivity Applications Gene Name Protein Name Immunogen Specificity	
Applications WB;ELISA Gene Name RPAP2 Protein Name Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2 Immunogen The antiserum was produced against synthesized peptide derived from human RPAP2. AA range:460-509 Specificity RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II complex., sudpessing that it is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA depaperone/scaffolding protein, suggesting that it is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA	Applications Gene Name Protein Name Immunogen Specificity	Human;Rat;Mouse;

Protein Name Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2 Immunogen The antiserum was produced against synthesized peptide derived from human RPAP2. AA range:460-509 Specificity RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, function: Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II complex., Background function: Forms an interface between the RNA polymerase II complex., Interface between the RNA polymerase II complex., Interface between the RNA polymerase II complex., Background function: Forms an interface between the RNA polymerase II complex., Interface between the RNA polymerase II complex.	Protein Name Immunogen Specificity	WB;ELISA
Immunogen The antiserum was produced against synthesized peptide derived from human RPAP2. AA range:460-509 RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formating. similarity. Belongs to the RPAP2 family, subunit. Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Immunogen Specificity	RPAP2
RPAP2. AA range:460-509 Specificity RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation, similarity: Belongs to the RPAP2 family .,subunit:Tightly associated with the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA objection. Specifically is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA objection.	Specificity	Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2
Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation., similarity:Belongs to the RPAP2 family., subunit: Tightly associated with the RNA polymerase II complex., Background function:Forms an interface between the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II complex.,	•	
Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation., similarity: Belongs to the RPAP2 family., subunit: Tightly associated with the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Formulation	RPAP2 Polyclonal Antibody detects endogenous levels of RPAP2 protein.
Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation., similarity:Belongs to the RPAP2 family., subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA		Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., Background function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II complex.,	Source	Polyclonal, Rabbit,IgG
applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., Background function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA chaperone/scaffolding protein, suggesting that it is required to connect RNA	Purification	·
Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., Background function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Dilution	
Storage Stability -20°C/1 year RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., Background function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Concentration	
Synonyms RPAP2; C1orf82; Putative RNA polymerase II subunit B1 CTD phosphatase RPAP2; RNA polymerase II-associated protein 2 Observed Band 70kD Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Purity	≥90%
RPAP2; RNA polymerase II-associated protein 2 Observed Band Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Storage Stability	-20°C/1 year
Cell Pathway Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner. Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Synonyms	·
Tissue Specificity Brain, Function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Observed Band	70kD
Tissue Specificity Brain, function function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Cell Pathway	Cytoplasm . Nucleus . Shuttles between the cytoplasm and the nucleus in a CRM1-dependent manner.
chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation.,similarity:Belongs to the RPAP2 family.,subunit:Tightly associated with the RNA polymerase II complex., function:Forms an interface between the RNA polymerase II enzyme and chaperone/scaffolding protein, suggesting that it is required to connect RNA	Tissue Specificity	
chaperone/scaffolding protein, suggesting that it is required to connect RNA	Function	chaperone/scaffolding protein, suggesting that it is required to connect RNA polymerase II to regulators of protein complex formation, similarity:Belongs to the
