TIN2 Polyclonal Antibody

Catalog No YP-Ab-02117 Isotype IgG Reactivity Human;Rat;Mouse; Applications WB;HC;IF;ELISA Gene Name TINF2 Protein Name TERF1-interacting nuclear factor 2 Immunogen The antiserum was produced against synthesized peptide derived from human TINF2. AA range:71-120 Specificity TIN2 Polyclonal Antibody detects endogenous levels of TIN2 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB: 1/500 - 1/2000. IHC: 1/100 - 1/300. ELISA: 1/10000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms TINF2; TIN2; TERF1-interacting nuclear factor 2; TRF1-interacting nuclear protein 2 Observed Band 53kD Cell Pathway Nucleus . Chromosome, telomere . Associated with telomeres.; [Isoform 1]: Nucleus matrix . Tissue Specificity Detected in heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas.

Background	This gene encodes one of the proteins of the shelterin, or telosome, complex which protects telomeres by allowing the cell to distinguish between telomeres and regions of DNA damage. The protein encoded by this gene is a critical part of shelterin; it interacts with the three DNA-binding proteins of the shelterin complex, and it is important for assembly of the complex. Mutations in this gene cause dyskeratosis congenita (DKC), an inherited bone marrow failure syndrome. [provided by RefSeq, Mar 2010],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
