

OR1L1 Polyclonal Antibody

Immunogen Synthesized peptide derived from part region of human protein		
Reactivity Human;Rat;Mouse; Applications WB;ELISA Gene Name OR1L1 OR1L2 Protein Name Olfactory receptor 0R9-27) Immunogen Synthesized peptide derived from part region of human protein Specificity OR1L1 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 39kD Cell Pathway Cell membrane; Multi-pass membrane protein. Tissue Specificity Function caution:It is uncertain whether Met-1 or Met-51 is the initiator, function:Odorant receptor , similarity-Belongs to the G-protein coupled receptor 1 family. Background olfactory receptor family 1 subfamily L member 1 (OR1L1) Homo sapiens olfactory receptor family 1 subfamily L member 1 (OR1L1) Homo sapiens olfactory receptor are members of a large family of G-protein-coupled receptors or poteins are members of a large family of G-protein-coupled receptors poteins are members of a large family of G-protein-coupled receptors or poteins are members of a large family of G-protein-coupled receptors or a responsible for the recognition and G protein-mediated than dornone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by	Catalog No	YP-Ab-07455
Applications WB;ELISA Gene Name OR1L1 OR1L2 Protein Name Olfactory receptor 1L1 (Olfactory receptor 1L2) (Olfactory receptor 9-C) (OR9-C) (Omegacing Variety of New York) Immunogen Synthesized peptide derived from part region of human protein Specificity OR1L1 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 39kD Cell Pathway Cell membrane; Multi-pass membrane protein. Tissue Specificity Function caution:It is uncertain whether Met-1 or Met-51 is the initiator, function:Odorant receptor , similarity:Belongs to the G-protein coupled receptor 1 family., Olfactory receptor interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptors gare members of a large family of G-protein-coupled family is the largest the genome. The nomenclature assigned to the olfactory receptors family is the largest the genome. The nomenclature assigned to the olfactory receptor family is the largest the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by	Isotype	IgG
Gene Name OR1L1 OR1L2 Protein Name Olfactory receptor 1L1 (Olfactory receptor 1L2) (Olfactory receptor 9-C) (OR9-C) (Offactory receptor OR9-27) Immunogen Synthesized peptide derived from part region of human protein Specificity OR1L1 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 39kD Cell Pathway Cell membrane; Multi-pass membrane protein. Tissue Specificity Function caution:It is uncertain whether Met-1 or Met-51 is the initiator.,function:Odorant receptor., similarity-Belongs to the G-protein coupled receptor? I family., olfactory receptor family 1 subfamily L member 1 (OR1L1) Homo sapiens Olfactory receptor are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptor in ordicated transduction of odorant signals. The olfactory receptors in a remembers of a large family of G-protein-coupled receptors (GPCR) arising from singl	Reactivity	Human;Rat;Mouse;
