Olfactory receptor 5H15 Polyclonal Antibody

family.,BackgroundOlfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated		
Reactivity Human;Rat;Mouse; Applications WB;IF;ELISA Gene Name OR5H15 Protein Name Olfactory receptor 5H15 Immunogen The antiserum was produced against synthesized peptide derived from human OR5H15. AA range:241-290 Specificity Olfactory receptor 5H15 Polyclonal Antibody detects endogenous levels of Olfactory receptor 5H15 protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/5000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms OR5H15; Olfactory receptor 5H15 Observed Band 32kD Cell Pathway Cell membrane; Multi-pass membrane protein. Tissue Specificity Olfactory receptor sinteract with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptors arising from single coding-exon genes. Olfactory receptor genes fuels with many neuroransmitter a neuronal response that triggers the perception o	Catalog No	YP-Ab-13594
