

SUCLG2 mouse mAb

matters needing attention	Avoid repeated freezing and thawing!
Background	
Function	GTP-specific succinyl-CoA synthetase functions in the citric acid cycle (TCA), coupling the hydrolysis of succinyl-CoA to the synthesis of GTP and thus represents the only step of substrate-level phosphorylation in the TCA. The beta subunit provides nucleotide specificity of the enzyme and binds the substrate succinate, while the binding sites for coenzyme A and phosphate are found in the alpha subunit.
Tissue Specificity	Mainly expressed in liver, kidney, heart, spleen and skeletal muscle. Also found in intestine and colon, and in low amounts in lung, brain, prostate, testis and ovary.
Cell Pathway	Mitochondrion .
Observed Band	48kD
Synonyms	
Storage Stability	-20°C/1 year
Purity	≥90%
Concentration	1 mg/ml
Dilution	WB 1:500-2000
Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Source	
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Specificity	This antibody detects endogenous levels of SUCLG2 at Human, Mouse
Immunogen	Synthesized peptide derived from human SUCLG2
Protein Name	Succinyl-CoA ligase [GDP-forming] subunit beta, mitochondrial (GTP-specific succinyl-CoA synthetase subunit beta) (Succinyl-CoA synthetase beta-G chain) (SCS-betaG)
Gene Name	SUCLG2
Applications	WB
Reactivity	Human,Mouse
Isotype	IgG
Catalog No	YP-mAb-18386

UpingBio technology Co.,Ltd

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
